

Can You Hear Me Now?

Communications between aircraft and Air Traffic Control as well as communications between multiple aircraft represent an essential part of ensuring safe aviation operations. Having a shared mental model of what every pilot is doing in a given segment of airspace is a basic concept in Standard Operating Procedures (SOP). Knowing how to communicate with confidence makes your flying experience much improved while letting others know you can sound like a pro. Pilot deviations and runway incursions continue to be a problem. Please plan to attend and participate in this important seminar.

Directions: I 95 to Lordship Boulevard. Great Meadow Road to Volo Hangar. Fly in aircraft are subject to a landing fee.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
